

ZOTA-26-00008: REGULATION OF DATA CENTERS

DRAFT Text Amendment

6/22/2026

Section 1-11: Definitions

...

Data center means all or a portion of a permanent building primarily engaged in the storage, management, processing, and transmission of digital data, housing computer and network equipment, systems, servers, appliances and other associated components related to digital data operations, regardless of whether such facility serves on- or off-site users. Data centers may also include air handlers, power generators, water cooling and storage facilities, utility substations, and other associated utility infrastructure to support sustained operations at the data center. The term excludes server rooms.

Data center, major means a data center with more than 50,000 square feet of total floor area and which may include one or more electrical substations.

Data center, minor means a data center with up to 50,000 square feet of total floor and which may include one electrical substation.

...

Server room means one or more designated areas within a principal use, except a data center, housing computer and network equipment, systems, servers, appliances, and other associated hardware components related to digital data operations for its own use and where the total floor area of all such areas does not exceed 2,000 square feet or 10% of the principal use, whichever is more.

8. Minor data centers, but only when the following conditions are met:

- a. Applications shall provide the following information:

- 1) A water consumption plan outlining the total water requirements of the data center, including cooling needs, and any strategies to reduce or mitigate excessive water usage. The plan shall demonstrate that the water usage will not significantly strain Lexington-Fayette County's water supply.
- 2) A water conservation and sustainability plan which includes measures to minimize the data center's impact on water resources, such as the use of water-efficient cooling technologies and closed-loop systems.
- 3) An energy consumption plan outlining estimates of peak electricity demand and strategies for mitigating strain on local power infrastructure, including proposed improvements or alternatives to minimize the need for additional transmission lines.
- 4) Transmission line impact assessment identifying the need for new or upgraded transmission lines to meet the data center's electricity requirements. This assessment shall include the potential environmental impact on public land, including tree removal from public land and rights-of-way.
- 5) Noise plan which includes measures to comply with the noise standards specified in subsection (b)(2) below.

- b. The use shall comply with the following noise standards, in addition to the standards of Sections 14-70 through 14-80 of the Code of Ordinances:

- 1) Mechanical equipment, including generators, utility substations, and other power supply equipment, shall be fully enclosed and vertically screened on all sides by 100% opaque walls with sound attenuation properties.
- 2) The use shall not produce continuous sound that exceeds an average of 65 decibels over any 30-minute period from 8 AM to 6 PM, measured at any adjacent property boundary between the data center site and a residential zone. Nor shall data center operations produce continuous sound that exceeds an average of 55 decibels over any thirty-minute period from 6 PM to 8 AM.

ZOTA-26-00008: REGULATION OF DATA CENTERS

DRAFT Text Amendment

6/22/2026

measured at any adjacent property boundary between the site and a residential zone.

- 3) After issuance of the certificate of occupancy for each data center building, the Urban County Government may obtain sound studies or require the data center operator to provide a sound study to verify that the operation is in compliance with the requirements of subsection (b)(2) above. If a data center is found to be in violation of these requirements, the Urban County Government shall issue a notice of violation, and proceed through the zoning enforcement process established by Section 5.
- c. No data center building, air handlers, power generators, water cooling and storage facilities, utility substations, or other associated utility infrastructures shall be located within 1,000 feet of a residential zone or an agricultural zone located outside the urban service area.
- d. No data center shall be located within 1,000 feet of a school, daycare center, or other childcare services.
- e. The use shall provide the same 50-foot-wide perimeter landscaping that is required in Section 18-3(A)(1)(10) along all common boundaries, except street frontage, that abut a residential zone.
- f. Generators associated with the use shall be tested no more than once per week per unit. Such testing shall only occur during the hours of 12:00 PM to 6:00 PM, Monday through Friday. Except for generator testing or commissioning activities, generator use shall be limited to backup and emergency use only when the primary source of electricity is interrupted or unavailable. Continuous generator use outside of power outages or interruptions is prohibited.
- g. All external ventilation on structures associated with the data center shall be designed in a manner that does not result in waste heat, or heat generated as a byproduct of data center operations, adversely impacting adjacent properties. Exhausts, chimneys, and other sources of waste heat should be designed in a manner that directs waste heat away from adjacent properties.
- h. The Board of Adjustment shall specifically consider and be able to find:
 - 1) That the proposed use will not constitute a public nuisance by creating excessive noise, odor, traffic, dust, or damage to the environment or surrounding properties; and
 - 2) That the proposed use will not overburden public infrastructure or utilities.

e) *Prohibited Uses*

...

In addition to the uses permitted in Subsection (b) of this section, the following uses shall also be permitted in an Office/Warehouse Project:

As principal permitted uses:

- a. Offices and laboratories and data processing centers, limited to a maximum of seventy-five percent (75%) of the floor area of the building or project. This square footage limitation shall not apply if the project is located within the defined Infill and Redevelopment Area.
